**Dr. Rajendra P Joshi, DDG, Central TB division  
Ministry of Health and Family Welfare  
Government of India**

**Sub: Request to add short course drug-resistant TB regimen in the India TB guidelines and scale up TB Preventive Therapy.**

Honorable Prime Minister Shri Narendra Modi ji,

We are writing to you today as people with tuberculosis (TB), TB survivors, representatives of the TB affected communities, and civil society members, to applaud your leadership in the fight against this deadly disease and ask for your continued support.

As the country with the largest TB burden in the world, and with the largest potential to bend the arc in the fight against TB, we are concerned about the India figures in the latest World Health Organization Global TB Report. The COVID-19 pandemic affected the public health system and especially the TB communities, however, we know that with political will and strong partnership we can achieve your ambitious target of a TB Free India by 2025. We thank you for your leadership to date and are looking forward to your continued leadership on the world stage at the upcoming World TB Day Summit in Varanasi, G20, and United Nations High Level Meeting on TB.

Ahead of World TB Day, the World Health Organization (WHO) and partners will be launching a call to action for a rapid roll-out of the novel BPaLM/BPaL regimen for drug resistant TB that has the potential to dramatically increase cure rates due to its high efficacy, allow broader access due to its lower cost and improve patient quality of life as this regimen is all-oral and significantly shorter than conventional

treatment regimens. One of the specific actions for governments is to update national policies to incorporate the new recommendations in a framework of the national programme that includes antimicrobial stewardship, patient care and support.

We understand that the release of new standards reflecting WHO's latest guidelines on DR-TB treatment are imminent from our National TB Program and we would like to recommend that you leverage the stage at the upcoming World TB Day Summit to rapidly respond to this shorter and more effective treatment for all people suffering from drug-resistant TB by publicly committing to nationwide programmatic adoption of this new life saving and improving regimen. Additionally, we recommend that you further scale up the adoption of TB Preventive Therapy. With prevention at the forefront of your fight against TB, we can make long strides towards reinforcing India as an ambitious

leader driving accelerated action to end TB and would generate applause from all partners engaged in the TB response on a global stage.

To make India TB Free by 2025, it is critical that we deploy all tools in our toolkit, including, shorter, safer, and more effective new treatments regimens like BPaLM/BPaL and a scale up of TB Preventive Treatment. We stand ready to applaud and offer all support and assistance to you in making India TB Free.

Kind regards,
